CEO'S COMMENTARY

Despite restructuring activities to implement the Group's realignment strategies, the business posted a pleasing 45% earnings growth from continued operations, including profit from associates, on the back of a 6% revenue improvement.

Substantial improvements in total earnings are tempered to 11% by a CGT inclusion rate change, affecting deferred tax, on a transaction relating to discontinued operations arising from the disposal of Quality Beverages in the prior year.

Plastic Packaging - Bowler Plastics

Notwithstanding a subdued FMCG market and the exit of the substantial SoftBev bottle blowing business (which was taken in-house), Plastics has managed to not only replace this revenue, but also a 6% growth in revenue. Attributable profit remained unchanged at R25,8mil to the previous year despite a provision for penalties related to the SoftBev Bottle Blowing Plan triggered by implementation delays. The project is ongoing and the final outcome thereof will only unfold in the coming months.

Capex spend of R52,8 mil committed during this period to signed contracts illustrate the unprecedented activity levels. Additional new PET bottle manufacturing capacity was commissioned in Johannesburg with more projects to follow. The Rand devaluation did not have a substantial impact on the performance of the business during this period, however the negative cost impact was felt from January 2016. Bowler Plastics is continually entrenching and expanding its premiere niche position in the rigid plastics packaging field.

Beverages - SoftBev

The good contribution by our newly-formed associate company, SoftBev Proprietary Limited, of R14,5mil was especially rewarding in the light of considerable challenges resulting from the "smerger" of Quality Beverages 2000 Proprietary Limited with Shoreline Sales and Distribution Proprietary Limited. The amalgamation of the KZN, Johannesburg and Cape Town businesses into a national unit was well achieved on various operational and reporting levels in time for the summer season. Short term supplier and capacity challenges as well as organisational constraints challenged productivity levels which affected stock availability. The hot weather contributed to favourable performances particularly in KZN.

Outlook

While the SoftBev business continues its focus on establishing and entrenching its national profile by implementing its strategies in commanding significant "share of throat" for its wide range of offerings, the Bowler Group's primary focus is directed to its Plastics packaging operations. The FMCG market is experiencing a period of significant realignment and recapitalisation of the manufacturing capabilities and within this context the next months will continue to see the implementation of long term projects by Bowler Plastics. The devaluation of the Rand is likely to strongly influence further opportunities, as the aftermath effects are being felt at retailer level. This is resulting in a reassessment of the overall supply chain which should favour South African manufacture.
